

DR YIELD software & solutions appoints Marubeni Solutions as its exclusive distributor in Japan

Graz, Austria & Tokyo, Japan. - March 28, 2007 – DR YIELD software & solutions, the leading provider of yield control software, announced here today that it has signed an agreement with Marubeni Solutions Corporation of Tokyo to be its exclusive distributor in Japan.

Under terms of the agreement, Marubeni Solutions will make the YieldWatchDog™ solution accessible to Japanese semiconductor manufacturers. YieldWatchDog™ identifies early signs of yield degradation in the vast amount of electrical test data. Using patent-pending statistical aggregation techniques for the handling of these data, it is the premier software for controlling parametric and systematic yield at advanced technology nodes.

Marubeni Solutions will not only act as distributor for the YieldWatchDog™ software solution in Japan but will also provide local technical support for Japanese customers. "We are pleased to have a partner with such a solid reputation as Marubeni Solutions on the important Japanese market", says Dieter Rathei, Managing Director of DR YIELD. "For the introduction of a new, innovative type of software like the YieldWatchDog™ solution we needed a partner with a thorough understanding of both the technology and the market opportunities."

"It is very exciting to be engaged in a business relationship with DR YIELD software & solutions and to market their excellent products in Japan. We anticipate a long-lasting and very successful partnership," commented Shigeyuki Tabata, General Manager of Semiconductor Systems at Marubeni Solutions

About Marubeni Solutions

Marubeni Solutions Corporation (MSOL), with headquarters located in Tokyo, is a leading company introducing the advanced technology products in Japan and Asia from all over the world. The main business is sales, consulting, maintenance/technical servicing and import/export of systems including Electrical devices, Equipment, Network systems and CAD/CAM/CAE systems. For more information, visit: <http://www.msol.co.jp/>

About DR YIELD software & solutions

DR YIELD is an innovative provider of next-generation software for yield control in the semiconductor industry. Our software solution YieldWatchDog™ enables monitoring of systematic and parametric yield and allows early detection of potential yield degradation at a level of unprecedented thoroughness. YieldWatchDog™ therefore significantly improves the productivity of semiconductor manufacturing organizations. For more information please visit: <http://www.dryield.com/>
