

DR YIELD software & solutions reports 2009 as most profitable year ever

Graz, Austria - January 27, 2010 – DR YIELD software & solutions GmbH has filed its balance sheets for the fiscal year 2009 at the court having jurisdiction here in Graz today, as required by Austrian corporate law.

"We are glad that after the difficult year 2008, which we ended with a marginal profit only, we can now report the highest profit in the 5 year history of the company. This shows the successful implementation of our diversification strategy: from a specialist solution provider for the semiconductor industry to other industries, most notably the solar cell manufacturers, where customers can now also benefit from our advanced control technologies", says Dieter Rathei, Managing Director of DR YIELD software & solutions GmbH.

As a privately held company DR YIELD software & solutions GmbH is not required to publish detailed earning statements.

About DR YIELD software & solutions

DR YIELD is an innovative provider of next-generation software for yield control in the semiconductor, photovoltaic and other data-intensive high-tech industries. Our software solution YieldWatchDog™ enables monitoring of all manufacturing data and allows early detection of potential production problems at a level of unprecedented thoroughness. YieldWatchDog™ therefore significantly improves the productivity of manufacturing organizations. For more information please visit: <http://www.dryield.com/>
